- **Kit content:** SWRC CAN bus to UART interface with wiring harness and ISO connector; antenna DIN adapter; camera adapter, plastic socket
- **Compatibility:** Compatible with several original radio systems
- Suitable for: ALPINE Head Units with "CONNECT2 I/F" input

INSTALLATION MANUAL

All installation work must be performed by a qualified professional installer only. The manufacturer / dealer is not liable for any kind of incidental or indirect damages. 04/2022 ALL RIGHTS RESERVED. Technical changes possible. No liability for misprints. A. Content and wiring harness connections

(12)

- 1 to RADIO connectors
- 2 to CAR connector

(1

- 3 to RADIO CONNECT2 I/F plug
- 4 Green/White SPEED output (connect to the Alpine radio)
- 5 POWER ANTENNA output
- 6 CAMERA control/REMOTE out
- 7 to optional/extra SERVICES:
 Orange Reverse output
 Green/White Speed output
- 8 to external switch (Blue cable)
- B. Additional accessories.

1. If the car is not equipped with open dash and single DIN radio frame, replace the radio dock with the following original Fiat spare part number: 735535319

- 9 CAN BUS connection access cable
- 10 CAN BUS housing for cables

Für externen Softe

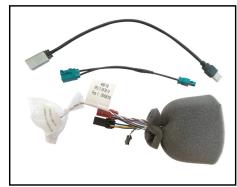

6

(2)

5

- 11 ISO/DIN antenna adapter
- 12 CAMERA input adapter

8

 If the car is not equipped with ISO connector for radio, you need the following Alpine part number: KIT-DU-OEM.

2

C. Connect the CAN bus cable to vehicle (point 10 / page 2).

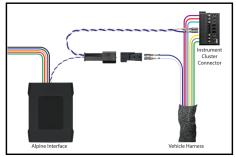

1. Remove the two screws of the instrument panel cover.

3. Now remove the cover completely from the instrument cluster.

2. Lift the cover at the back first

 Establish a CAN bus connection to the instrument cluster. Laying the CAN cable from radio connector to the back side of instrument cluster.

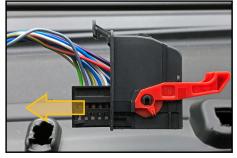

5. Remove the connector from the instrument panel.

6. Release the locking clips of the connector housing.

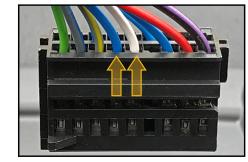

C. Connect the CAN bus to vehicle (point 10 / page 2).

7. Remove the connector from the housing.

9. Release the terminals of the CAN cables with the suggested release tool.

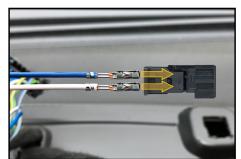

8. CAN cables: colors according to table.

Modelyear	CAN High	CAN Low
2014 -		
2011 - 2014		
2006 - 2011		

10.Remove both cables.

11.Insert both cables to the supplied 2 pin connector housing as shown.

12. Insert the terminals of the cables from the supplied T-Harness into the connector from the instrument cluster.

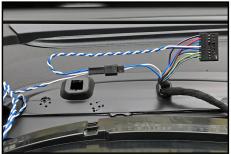

C. Connect the CAN bus to vehicle (point 10 / page 2).

13.Connect both CAN plugs.

15.Assemble the connector housing and the cover from instrument cluster in reverse order.

14.The CAN bus connection for the interface is now established.

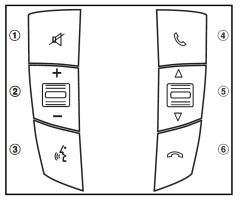

16.Connect the harness as indicated on page 12 of this installation manual.

D. Steering wheel remote control functions.

The Fiat Ducato, Citroën Jumper & Peugeot Boxer steering wheel remote control buttons perform the following functions:

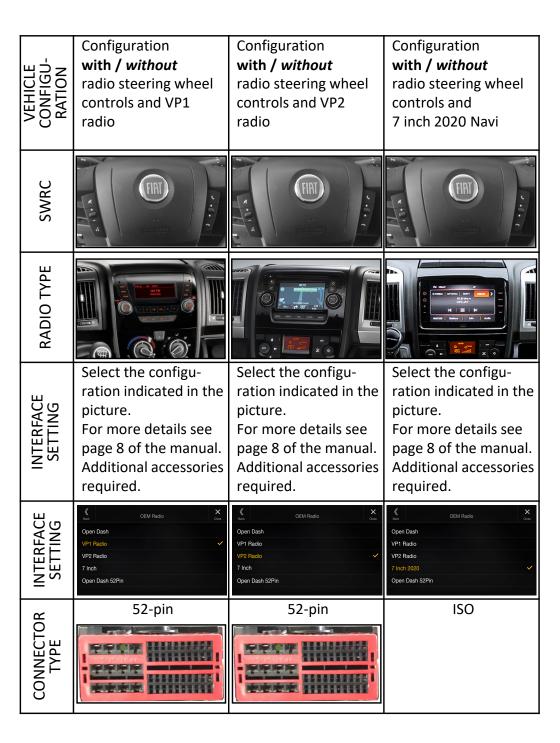

(if supported by the radio / vehicle):

- 1 Mute
- 2 Volume +/-
- 3 Voice Command *not in older Ducato
- 4 Accept incoming call / Voice Command
- 5 Seek +/-
- 6 Hang up active call / Source

E. Set the radio type according to the configuration of your vehicle.

Time & Date

- The menu item is only displayed in vehicles with the original VP2 radio *Sync radio clock*

- After installing the interface, if the vehicle had the VP2 OEM radio previously installed, you may find that the time clock in the instrument panel flashes. In this case the clock needs to be set or sync'd via the radio.
- H. Access the Interface Settings as shown in the pictures.

Ignition Logic (only if supported by vehicle)
Switch between Key and Door
Key = the radio switches on automatically when the key is turned in the ignition lock
Door = the radio switches on automatically when the central locking (must be supported by the vehicle) of the door is opened (PRE-ignition)
Ignition HOLD Minutes
Adjustable between 0 and 30 min(s)

The radio "runs on" the set time (0 to 30 min(s)) when the ignition is switched off from the vehicle / radio

Reverse Logic

- Switch between Natural and Delayed
- Natural = Switches the reversing signal with activation / deactivation of the reverse gear immediately ON / OFF
- Delayed = Switches the reversing signal with activation / deactivation of the reverse gear with a delay ON / OFF

H. Access the Interface Settings as shown in the pictures.

Reverse OFF HOLD Seconds (0 to 30sec(s))
When you are removing the reverse gear, the interface will remove the reverse to the radio after the time period (0 to 30sec(s)) specified in the menu. (The camera image of the rear-view camera is displayed accordingly longer.)

Reverse ON HOLD Seconds (0 to 30sec(s))

- When you are engaging the reverse gear, the interface will trigger the reverse to the radio after the time period (0 to 30sec(s)) specified in the menu.
