

NOTA 550 X

The bond of tradition and modernity

Indiana Line is one of the most important Italian brands that are dynamically operating in the loudspeaker segment. Its origins date back to 1977. The models available in the Indiana Line offer perfectly combine the tradition and the experience of the brand with modern technical solutions and stylish design. The producer provides the customers with the highest

quality of workmanship combined with the appropriate use of components. As a result, the Indiana Line speakers are able to guarantee much better efficiency than competitive designs obtainable in the same price range.

High efficiency and appropriate dynamics

The Nota series of loudspeakers is not only an excellent value for money that has been achieved, among others, by the optimization of the production process and the appropriate combination of individual components. Nota is also a guarantee of high efficiency and great dynamics. As a result, the Indiana Line speakers can operate the power required by the most advanced audio systems, and at the same time ensure an amazing sound in the listening room – both in stereo and home theater systems (in connection with other loudspeakers).

Nota 550 X and its timeless design

The timeless design of the Indiana Line Nota 550 X perfectly reflects the craftsmanship of Italian design. Its elegantly contoured side panels are

finished with a durable and aesthetic vinyl, which is available in two colours – light walnut or black oak. Worth noticing is also a massive cabinet with two internal reinforcements, which rests on a lacquered base. The properly selected in terms of finish, the Nota 550 X model will not only be a real decoration of your living room interior, but will also surprise you with its sound – dynamic, emotional and strong.

Perfect sound in a wide frequency range

Nota 550 X is a free-standing, floorstanding loudspeaker with 135 mm woofers and mid-woofers. The polypropylene membranes guarantee a smooth and warm sound of the midrange acoustic frequencies, but at the same time allow for deep bass. The dynamics and the bass response of this loudspeaker are amazing.

The floor construction also uses a 26 mm tweeter with a silk dome, a neodymium magnet and a unique radial rear chamber. It is placed in a specially profiled front. To emphasize the uniqueness of the Indiana Line Nota series loudspeakers, only air coils and foil capacitors are used in the tweeter filter, thanks to which the treble is also clear and distinct.

Floor construction for medium-sized rooms

The 2,5-way design with a front ported bass reflex cabinet helps to obtain the right sound. This solution makes it easier to place the Nota 550 X speakers in the room. Thanks to this, you can place them, for example, close to a wall, without worrying about excessive bass enhancement. The Nota 550 X model will work especially well in medium-sized rooms – of 12 to 20 m². This loudspeaker has amplifier loading impedance between 4 – 8 ohms, and the recommended power of the amplifier should be in the range of 30 to 150 W.

The most important features of the Nota 550 X model:

- 2,5-way floorstanding acoustical design
- Crossover frequencies: 250 Hz and 2,8 kHz
- 135 mm woofer

- 135 mm mid-woofer
- 26 mm textile dome tweeter
- Bass reflex cabinet with a port at the front
- Frequency response: 38 Hz to 22 kHz
- Finish: black oak or light walnut
- Suggested amplifier power: 30 - 130 W
- Sensitivity: 91 dB (2,8 V / 1 m)
- Dimensions (H x W x D): 880 x 175 x 275 mm
- Weight: 11,4 kg
