

7000
SERIES

Love Movies. Love Music. Love Q Acoustics.

"If you genuinely care about audio quality, the difference the 7000 Cinema System can make to your home theatre setup is staggering."

SPEAKERS PICTURED

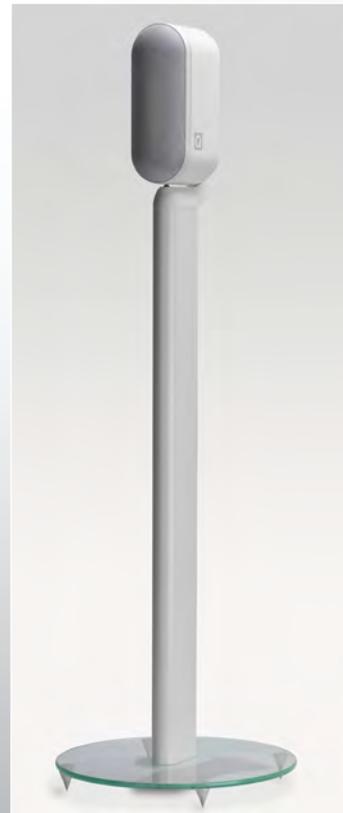

7000C Centre Speaker in Gloss White, 7000LR Speakers (Stereo left-right) in Gloss White.
7000S Subwoofer, in Gloss White.

WALL MOUNTABLE SPEAKERS

The 7000 speakers and subwoofer have been designed to be easily wall mountable.* Once mounted, the left, right and centre speakers can be angled to enhance their performance. The terminals are cleverly built into the mount and speaker cables can be hidden from view, making these ultra discreet speakers an excellent choice to partner a wall mounted screen.
*Subwoofer wall mount kit is an optional extra.

The 7000LR speakers can also be stand mounted. The stands (right) are available as an optional extra.

"Simply the best pound-for-pound speaker package of any type we've tested"

What Hi-Fi? Sound And Vision, October 2011

"I was impressed by the power and depth... you might think these were coffin-sized floorstanders"

Home Cinema Choice Magazine, March 2012

Perfect for virtually any configuration:

2.0, 2.1, 3.0, 3.1, 5.0, 5.1, 5.2, 7.1, 7.2 etc. table, wall or stand mount.

THE ELEGANT DESIGN WILL ENHANCE YOUR LOUNGE, BEDROOM OR KITCHEN.

7000 series models are full range speakers with higher than normal power capability and can therefore be used without a subwoofer. This makes them the ideal choice when there is a requirement for a small discreet speaker and where a subwoofer cannot be accommodated.

The (amazing) story so far...

Established in 2006, Q Acoustics has been a success right from the start. Its first products, the '1000 Series' shook up the UK loudspeaker industry, received unprecedented praise from reviewers worldwide and scooped many prestigious awards. More awards followed with the release of the upgraded '1000i Series', and even more for the '2000 Series'. However, not satisfied with merely designing truly remarkable conventional loudspeakers, Q Acoustics' design team introduced 'Q-AV' the world's first speakers to feature 'BMR' (Balanced Mode Radiator) drive units, enabling for the first time, the whole family to hear perfect home cinema sound, wherever they sat within the room. 'The Sunday Times' was so impressed they said:

"Some day all speaker systems will be like this"

January 2008

In 2009 Q Acoustics launched Q-TV, a revolutionary and technically advanced speaker solution which enhances the enjoyment of TV, movies, music and video games in your home, without intruding into your precious living space.

The story continues...

In 2011 Q Acoustics storms the 'Style' home cinema speaker market with the brilliant new 7000 models and also introduces substantial sonic advances to the 2000 Series with the new 2000i range.

"...music and films sound absolutely fantastic..."

ExpertReviews.co.uk, December 2011

...head and shoulders above the competition"

7000 5.1 System Pack in Gloss Black

The Q Acoustics 7000 Series

Q Acoustics 'moves the goalposts' once again with its new '7000 Series', a beautifully styled 5.1 home cinema loudspeaker package with truly class leading performance. To quote from the original Q Acoustics press release (March 2006):

"There would be absolutely no point in Q Acoustics offering 'me too' products that are no better than the competition. You may be assured, we wouldn't enter this important sector unless we were confident we could make a serious impact."

Today the message remains the same. The new 7000 Series is taking the 'Style' home cinema loudspeaker market by storm.

Why? Because we've done the only thing we know how to do - deliver speakers which are unequivocally superior to the competition in their price sector.

So how have we differentiated Q Acoustics from the rest? The simple answer is we have set new standards. The 7000 system is a beautifully styled home cinema loudspeaker package that reproduces music to the same award-winning standard with which it delivers ultra-dynamic movie soundtracks.

7000 Series Subwoofer

FEATURES

- Gloss Black or Gloss White finishes
- 250mm long-throw driver
- Accurate transient response and rhythmic timing
- MDF, infinite baffle enclosure
- 250 watt amplifier
- All terminals hidden
- Top mounted, easy-access controls
